

Welcome, Moneybee.

WORK BEGINS 11 SEPTEMBER

Hi Moneybee,

Thank you for trusting me with the Moneybee project. We have already discussed the direction in detail, and I am looking forward to starting on 11 September.

I will start by building the shell of the website. Once the design is set, I will make the backend work around the approved website. After that, I will add the final polish, including agentic workflows and SEO.

HOW WE WILL WORK

01 Website shell

We will set the page structure and visual direction together.

02 Backend

Once the design is approved, I will connect the admin, content, CRM, careers, and other agreed systems.

03 Final polish

I will then add the agentic workflows, SEO, and final publishing checks.

BEFORE WE START

Please send me the email address to use for admin rights.

I will use it for the admin account and project access. Please also send any brand files, approved content, or access details I should have before we begin.

Looking forward to starting.
Aryan
