Moneybee

Website progress update

Design is 80% done and we are on schedule

08 October 2026 · Shreyam Shah and the Moneybee team

Prepared by Aryan Kathawale

Where we are

80%

of the website design is done

All eleven pages are designed and built from your decks and the Content & Visual Plan. The last 20% is your final copy, the photographs and a few documents, all listed in this deck.

On schedule

Design and build have kept to the plan we agreed. The backend starts this week, alongside the remaining content.

Live preview

The whole site is online for your team to review: **moneybee-virid.vercel.app**. It is not indexed by search engines.

11
Pages designed and built

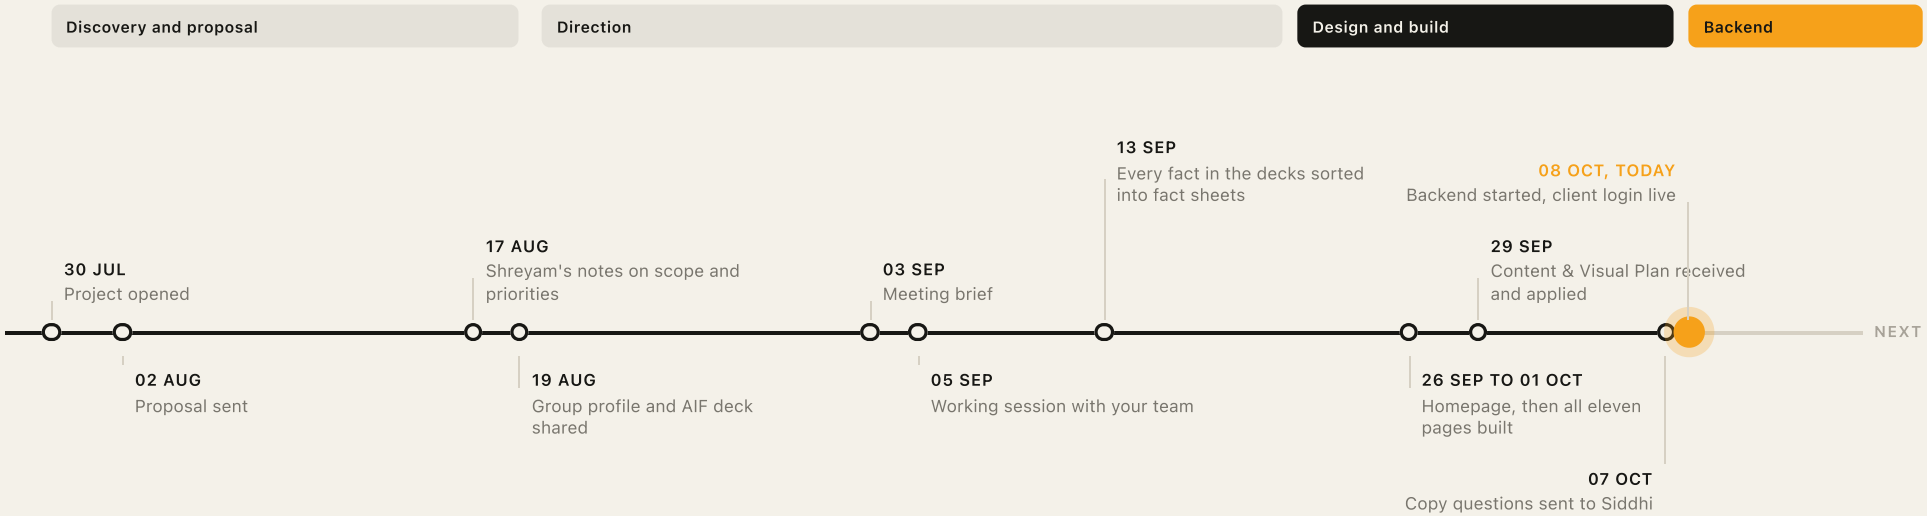

58
Content questions ready for your team

1
Client login, working on the preview

31 Jul
Date of the returns on the site, from your latest deck

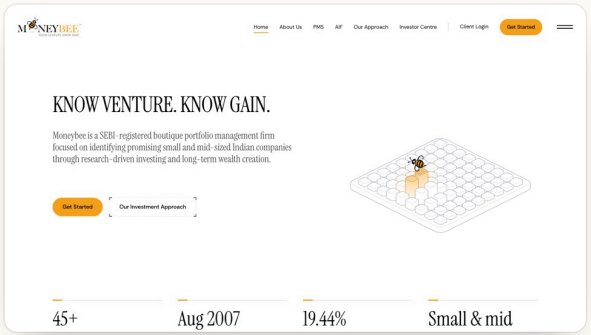

Everything below is either built, in progress, or waiting on one named input from Moneybee.

Progress

Ten weeks from the first conversation to a working site. Since 22 September the site has been rebuilt and refined almost every day.

What's built

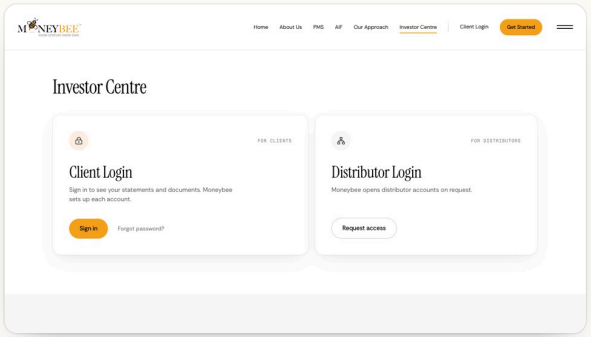

Home

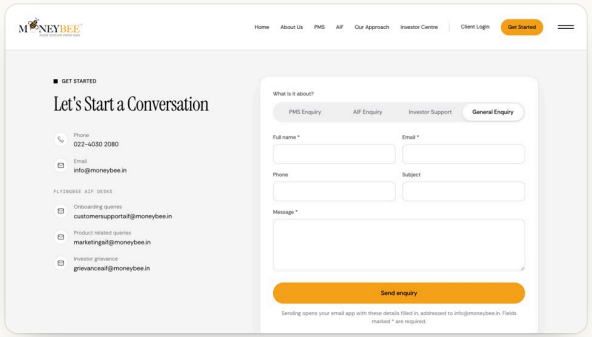

PMS

Ready

- Home
- About
- PMS vs AIF
- Contact
- Investor Centre
- Client Login

Investor Centre

Contact

Built, waiting for your copy

- PMS
- AIF
- Our Approach
- Performance
- Case Studies
- Careers

The six pages waiting for copy have their layout, drawings and figures in place. Some paragraphs still hold placeholder text.

NEXT STEP

Building the backend

PUTS IN

Your team

- Enter each month's fact sheet
- Add roles, team members, documents
- Follow up every enquiry
- Review and rate applicants

CHECKS AND KEEPS

One backend

- Compliance approves numbers before they go live
- One CRM for website and offline leads
- Every change recorded: who, what, when
- Moves to Mumbai before client data goes in

SHOWS

Website and client portal

- Returns and charts update by themselves
- Investors sign in to their statements
- Careers form with your own questions
- Visits and clicks tracked on PMS, AIF, Careers

Built so your team can run the site every month without us, and without a developer.

NEXT STEP

Order of work

1
Fact sheets
Monthly figures with maker and checker, staff roles, change history.

Started

2
CRM and API
Every form lands in one place, with an API for your own systems.

3
Careers portal
Editable roles and questions, applications stored, rated and filtered.

4
Client portal
Statements uploaded each month, investors notified by email.

Login live

5
The rest
Team, case studies, documents, tracking and the blog structure.

Data stays in India
SEBI's cybersecurity framework (August 2024) asks portfolio managers and AIFs to store and process data in India. We build on a test setup, then move everything to Mumbai on your AWS before any client data goes in.

Compliance built in
A figure only goes live after a second person approves it. Disclaimers and the as-of date appear with every return, automatically.

Each step is shown to your team on the preview before the next one starts.

What we used

Group profile
April 2026. Strategy, portfolio construction, risk, team, case studies.

AIF presentation
August 2026. Flyingbee's structure, terms and returns to 31 July.

Content & Visual Plan
Navigation, the pages, colours and tone, applied page by page.

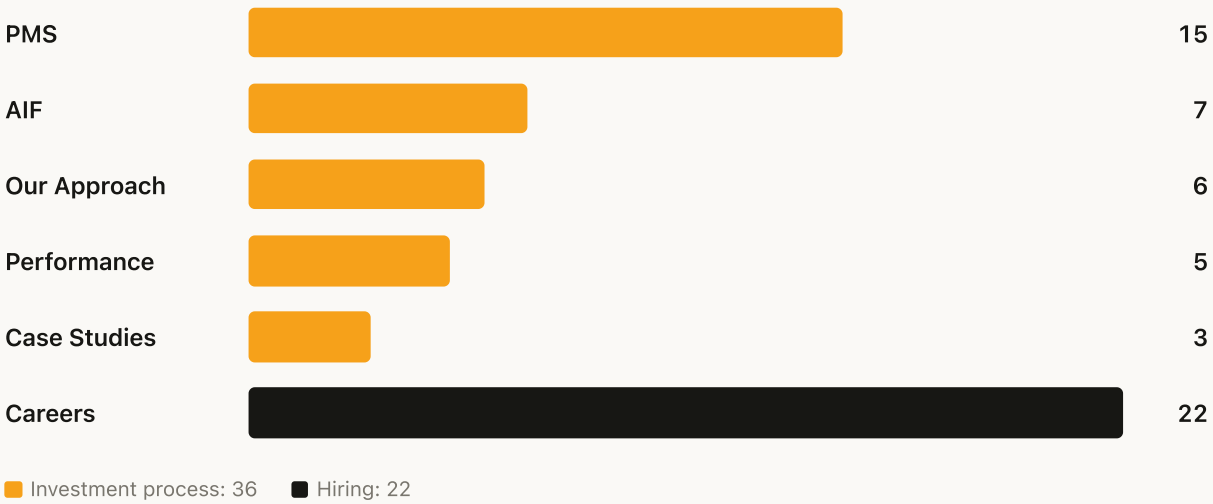

Your notes and emails
Scope, priorities, compliance points and the founder's thesis.

Everything you shared is on the site.

Every number, name and sentence comes from these four sources. Where they did not cover a section, we left a placeholder instead of guessing. Those placeholders are the gaps on the next slide.

Nothing on the site is invented. Figures carry the date and source they came from.

The gaps

58

Questions, already written, each with a screenshot of where the answer goes.

Also pending

11 investor documents and their dates

3 company logos for the case studies

Confirm the enquiry form choices

What the questions ask

How you research a company, how you size and exit positions, how you manage each risk, and what each performance chart should say.

Rough notes are enough. We turn them into final copy and send investment wording for compliance approval.

Who we need

One person from your investment team

Someone who knows the investment process day to day, to work through the 36 investment questions with Siddhi. The questions are ready in a shared answer sheet.

Investment lead — Siddhi — We write the copy — Compliance approves — Live

How: answer in the sheet, or talk it through with Siddhi on two short calls and she writes it up

Time: a few hours across a week

Rough notes are fine. We turn them into final copy and send it back for approval

Compliance

Pournima and Suprit approve investment and performance wording before it goes live, as agreed in September.

HR

Open roles, the application steps and 22 careers answers, plus who approves hiring copy.

Siddhi coordinates every answer from your side. One named person per area keeps it moving.

Why now

The portraits on the site today come from the decks, about 270 by 350 pixels. Large screens need around 2000 pixels on the long side.

What works best

One photographer, one session, the same light for everyone

Original files, not WhatsApp copies

Consent to publish from everyone shown

Used on Home, About, Careers and Contact. A half-day shoot at the office covers all of it.

What we need from you

01

Name the investment contact for Siddhi

Owner _____ Date _____

02

36 investment answers

Owner _____ Date _____

03

Compliance approver for performance wording

Owner _____ Date _____

04

HR: roles and 22 careers answers
